

Web Programming – SYST10199

Assignment 4:

To collect information from one form and transfer them to a second form and calculate/display the information.

Form1 Fields: - All the fields are required

Company name (string); Owner (string); Address (string);
Phone number (string); Annual sales (number); Borrow amount (number);
Payment terms (number).

Form2 Fields:

- Company name; Annual sales; Borrow amount; Payment terms (All from Form1).
- Interest (number) = Borrow amount * Payment terms / 12 * 3%.
- Payment (number) = Borrow amount + Interest.
- Profit (number) = Payment – Borrow amount.

Process:

- Collection the information from "Form1".
- Click on a "button" in "Form1" to transfer the information to "Form2".
- Click on a "button" in "Form2" to calculate and display the information.

Submission:

- I will be using the **Chrome** browser to grade the assignment.
- **Submit** a zipped copy (.zip extension - .rar extension will not work) of your HTML page, CSS file, image files, etc. in **SLATE Assignment #4 dropbox** by the due date.
- Assignments can be submitted up to 3 days after the due date with 10% off per day. After 3 days the assignment will no longer be accepted.
- Your file should be named: **FIRSTNAME.LASTNAME.Assignment4.**
- Only the last submission is accepted and marked, all other submissions are ignored.
- This assignment must be completed **individually**.
 - Any attempt at cheating on the assignment will result in a grade of zero.
- Please refer to the [Academic Dishonesty Policy](#).
